

CATHEDRAL OF THE PLAINS

Victoria, KS

The polycarbonate protective covering over the Munich stained glass at the landmark Cathedral of the Plains had become cloudy and brittle. New 1/4" tempered glass was installed using a vented, anodized aluminum perimeter framing system.

"As soon as the old coverings were removed, light began pouring through the stained-glass windows, giving them more brilliance and spilling light into the sanctuary," wrote reporter Beccy Tanner, of The Wichita Eagle.

Now the congregation and visitors will enjoy the protection, light, and beauty offered by the tempered glass coverings.
